

# “Positive /Negative Rhododendron” Watercolor Workshop with Linda Wokoun Supply List

I will do my best to help you make use of the supplies that you already have on hand, so please bring whatever paints and brushes you normally use in your watercolor practice. Don't forget water containers, spray bottle and paper towels and a variety of round and large flat brushes. A hair dryer is a big help since each negative painting layer starts on dry paper. In addition, you may want to consider adding the following supplies:

## Paper:

- 1 to 2 half sheets of cold pressed watercolor paper, either 140# or 300#. To save time in class, you may wish to draw your images onto your paper in advance
- **Several** small sheets of practice watercolor paper. (1/4 sheet or smaller) Backs of “failed” paintings are a good choice. Just be sure that your “practice” paper is the same quality that you normally use for painting.

## Paint:

Do not feel like you need to purchase every color. Try to come close with the paints that you already own. Once you've experimented, you can decide if you want to add pigments to your collection.

- Brown/Orange: Quinacridone Sienna by Daniel Smith is beautiful. Burnt Sienna by Mission is excellent. Burnt Sienna by most manufacturers will work and is a great workhorse color.
- Blues: Transparent blues with a slightly green undertone. Antwerp blue, Prussian blue, Cyan, Berlin blue are all good choices.
- Turquoise: Cobalt Turquoise Light, Cerulean, Cobalt Teal, Sleeping Beauty Turquoise are all good
- Red: A warm red such as Scarlet Lake or Vermillion or Quinacridone Coral and a cool red such as Alizarin Crimson or Permanent Rose or Quinacridone Rose
- Magenta or Pink: Quinacridone Magenta, Quin Lilac or Quin Pink are good. Opera, Fuschia, or rose will also work
- Yellow: Transparent warm yellows such as New Gamboge (any manufacturer except Winsor Newton), Carr Yellow by American Journey, Golden Yellow by Maimeri Blu or Cadmium Yellow Orange. I also love Aussie Red Gold by Daniel Smith for granulating
- Masking fluid – Optional. I recommend Pebeo
